**BULLDOG® HYDRAULICS & GASKETS** was originally founded in 1957 and acquired by its current owners in 2001. During its 50+ years of operation, Bulldog® Hydraulics & Gaskets has experienced rapid growth and has earned a reputation for excellent product quality, friendly customer service, and distinguished technical support. Bulldog® Hydraulics & Gaskets provides hydraulic and gasket products to a broad customer base. Both of these product areas have expanded to include extensive kit building capabilities that service and support several types of industries worldwide. Bulldog® Hydraulics & Gaskets stocking representatives are located in most major cities in North and South America, Europe, Africa, Asia, and the Pacific Rim.

Bulldog® Hydraulics & Gaskets currently operates a manufacturing, distribution, and administrative office facility located at the South Meadows Business Park in Reno, Nevada.

## PRODUCT RANGE

Bulldog® Hydraulics & Gaskets stocks and maintains a large inventory of both hydraulic and gasket sealing products. Hydraulic sealing items such as rod seals, rod wipers, rod bearings, piston seals, wear rings, o-rings, back-up rings, and vee-packings are some of the many items that are stocked. Each of these items is designed and/or specified for the critical sealing applications of hydraulic cylinders and other demanding hydraulic sealing applications. Gasket sealing products such as soft gaskets, reinforced gaskets, and sealing products normally replaced along with gaskets (for example, oil seals, o-rings, and other elastomeric products) are also inventoried. Special attention is paid to the proper selection of gasket materials based upon application considerations. Bulldog® Hydraulics & Gaskets specializes in materials ranging from basic elastomers to highly advanced elastomeric compounds. This allows us to provide our customers with the most successful solutions to the broadest range of sealing applications.

## KIT ASSEMBLY AND CUSTOM PACKAGING

Bulldog® Hydraulics & Gaskets maintains facilities specifically designed for the assembly of components into kits and other forms of custom packaging. Extensive capabilities have been developed to support the process of kit manufacturing and assembly. Customer requested kits can be easily documented and integrated into our kit assembly process. Custom packaging capabilities include the ability to apply part numbers to items, bags, and boxes. In addition, items can be boxed or placed on flat sheets (for example, corrugated sheets) for the application of labels and shrink-wrapping. These Bulldog® Hydraulics & Gaskets kit and packaging capabilities can offer substantial advantages to customers by providing them with pre assembled kits for service and repair needs. Pre assembled kits, when compared to individual components, can provide overall reductions in total product costs by reducing purchasing, receiving, quality control, and warehousing activities. In addition, pre assembled kits can increase customer serviceability and satisfaction.

## TECHNICAL SUPPORT

The technical staff at Bulldog® Hydraulics & Gaskets has an in-depth knowledge of the sealing applications for many types of mobile equipment. Some of these applications include hydraulic cylinders and other hydraulic components, diesel engines, and transmissions. Our experience with sealing and gasket products allows us to provide technical support to customers and end users. The ability to provide recommendations based upon Bulldog® Hydraulics & Gaskets design standards, in addition to analyzing existing designs for potential improvements, are just some of the many advantages our technical staff may offer our customers.
